

**RELEASABLE CORD APPARATUS AND BREAKAWAY  
END PORTION FOR WINDOW TREATMENTS**

**ABSTRACT OF THE DISCLOSURE**

A window treatment includes a cord locking system, a breakaway end portion for a cord, and a releasable cord connection apparatus to prevent children or pets from becoming entangled in cords. A cord locking system includes a locking mechanism, a rotating portion and a spring portion. A breakaway end portion includes a housing, a stop portion, and at least one track. A releasable cord connector apparatus includes a receptive member and a connective member that inserts into the receptive member and releases when a force is applied.
